

Thirukural Automation

Digital Wisdom delivered daily via Salesforce Low-Code

A Trailblazer Project by Karthick R

The Mission

Integrating 2,000-year-old Tamil wisdom with 21st-century cloud technology
to inspire minds every single morning.

The Challenge & Opportunity

✖ The Manual Void

In our busy lives, accessing classic literature daily is often forgotten. Finding a Kural, its translation, and explanation manually every morning is time-consuming and inconsistent.

✔ Automated Enlightenment

A zero-manual-effort solution that uses Salesforce scheduled triggers to deliver a personalized Kural with explanation directly to users, ensuring consistency and cultural connection.

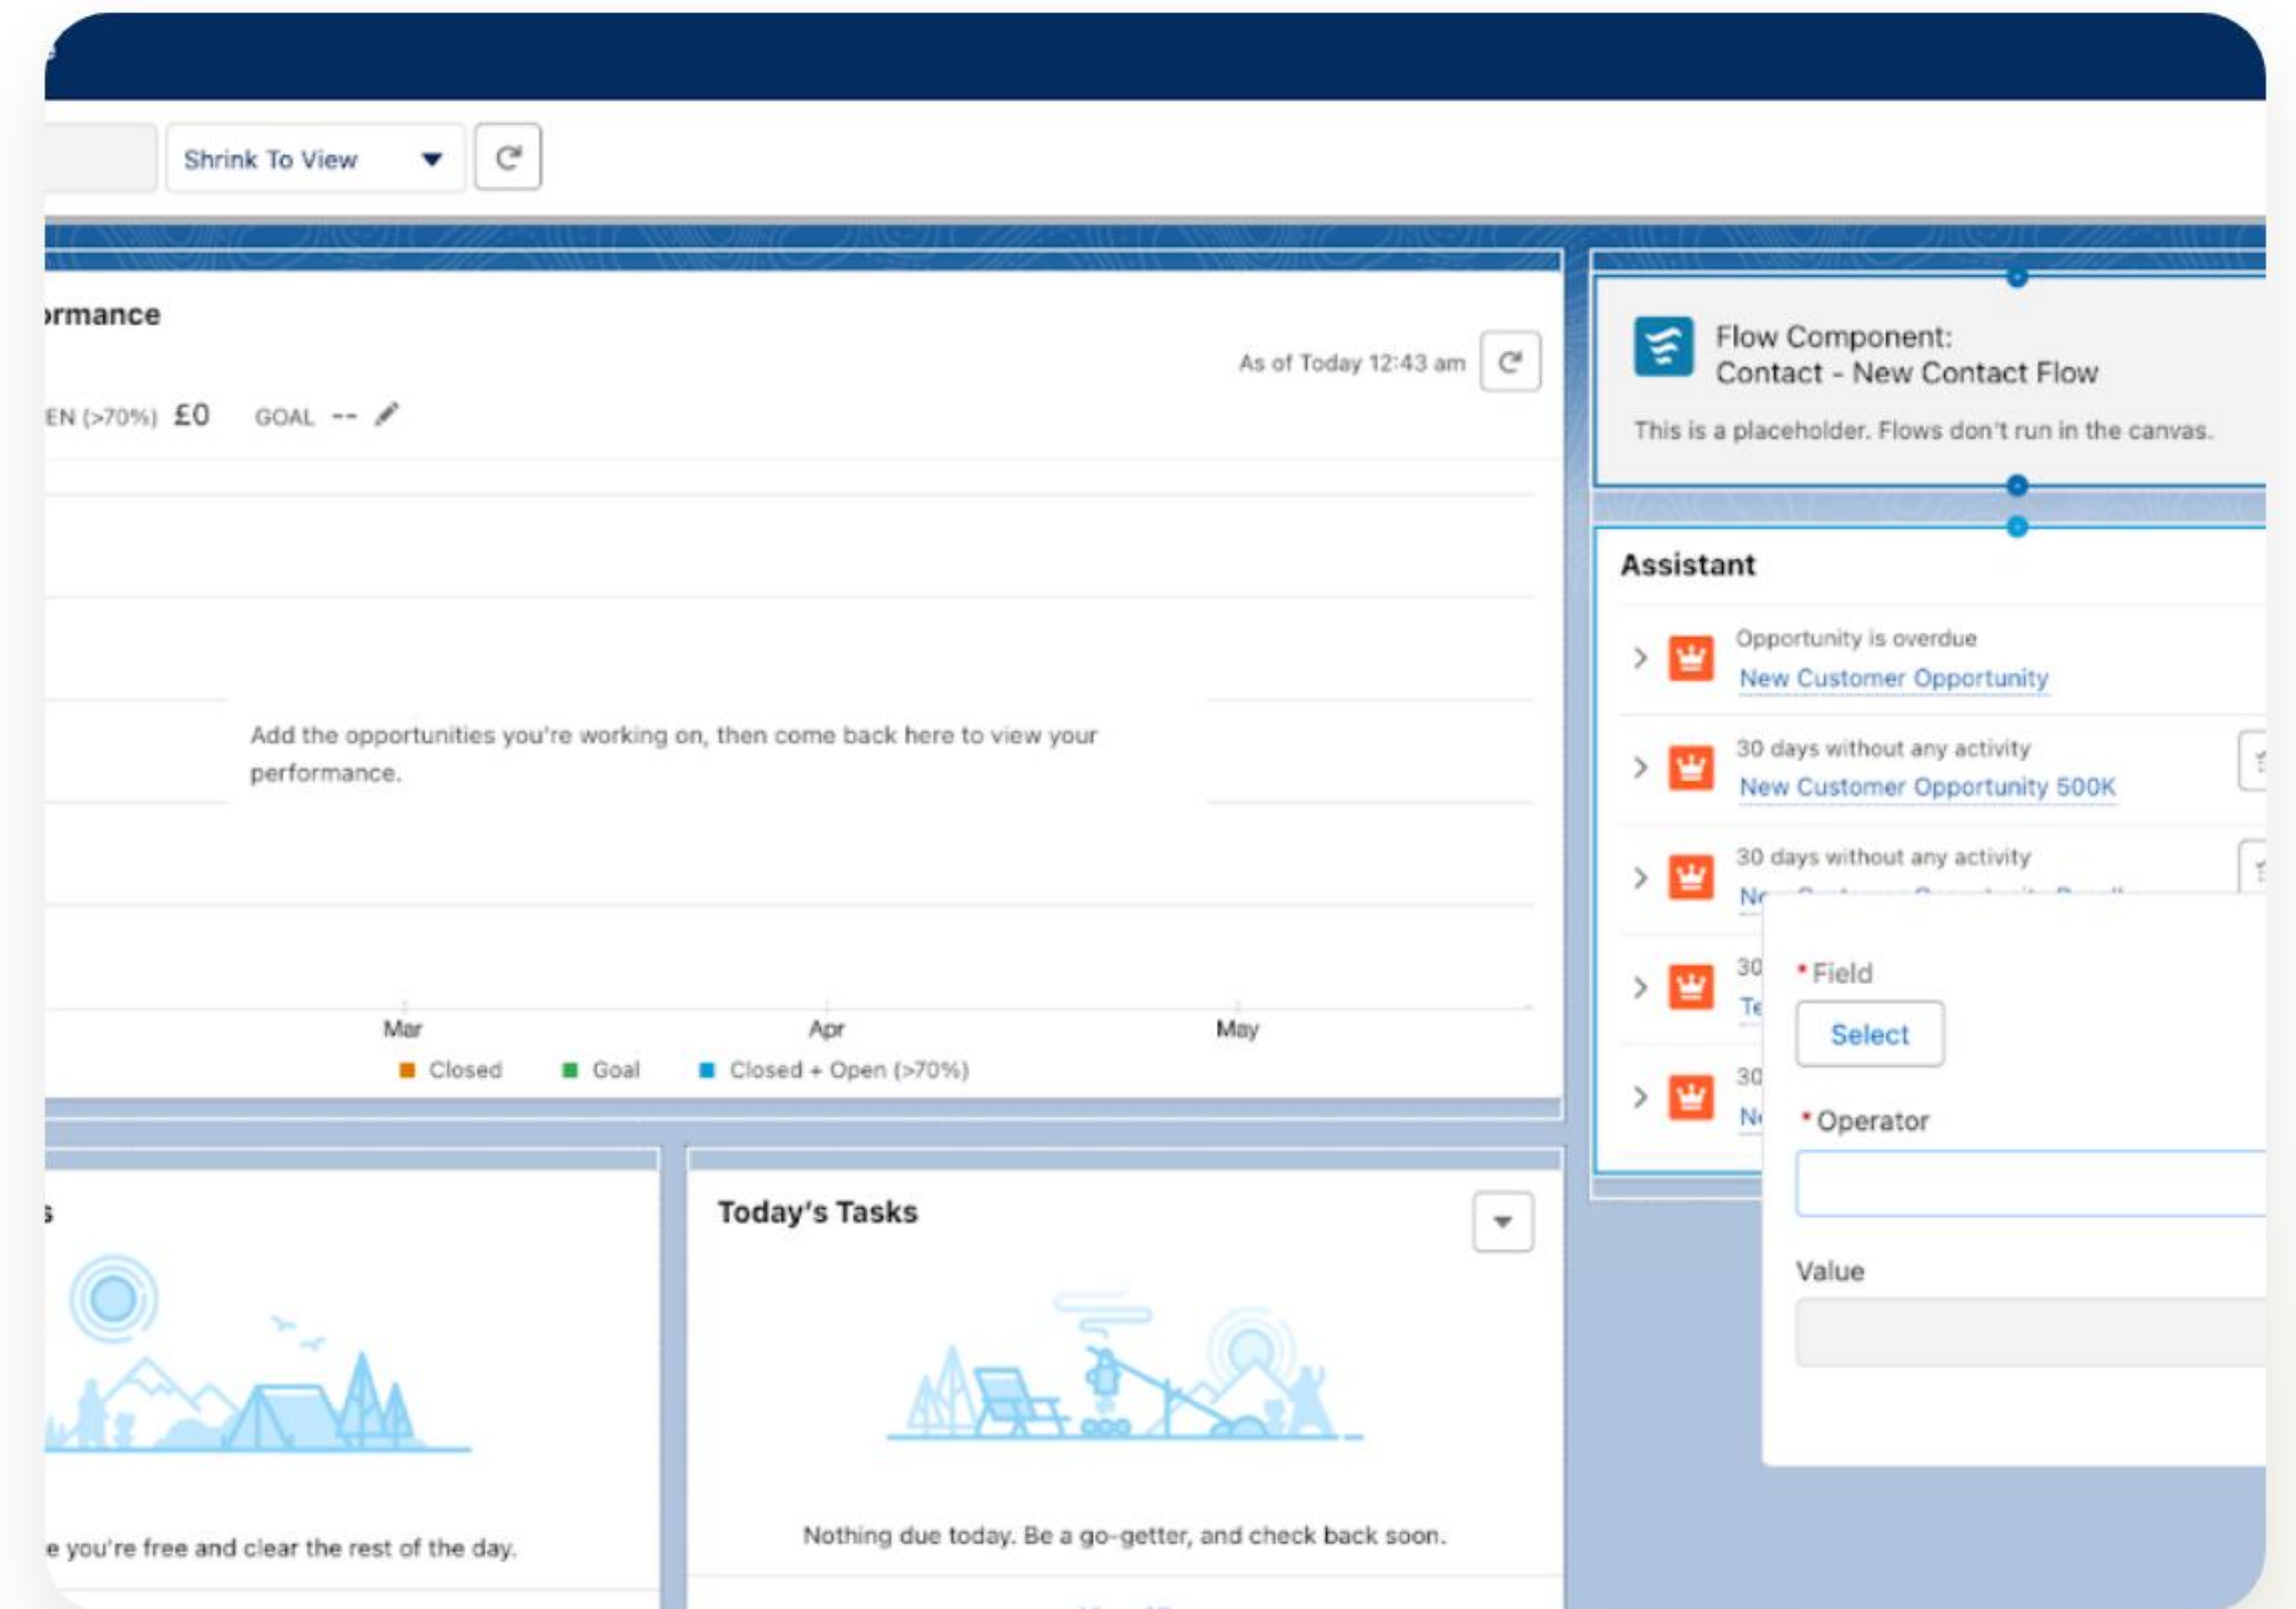

Modern Technology Stack

 **Salesforce CRM:** The core platform for data and user management.

 **Flow Builder:** Orchestrating the automation logic using Scheduled Flows.

 **Thirukural API:** External JSON data source for 1330 couplets.

 **Messaging Engine:** Multi-channel delivery via Email & Notifications.

The Power of Scheduled Flows

Using **Schedule-Triggered Flows**, the system runs autonomously every morning at 7:00 AM.

- No manual clicks required
- Batch processing of user records
- Reliable and scalable execution
- Native Salesforce security

Step-by-Step Automation

1. Trigger

Flow wakes up daily at the scheduled time.

2. Fetch

Retrieves a Kural via HTTP Callout to the API.

3. Process

Formats Tamil text, English translation & explanation.

4. Deliver

Dispatches the content to the designated recipients.

Visualizing the Delivery

User Experience

Users receive a clean, easy-to-read notification. The content includes:

- Original Tamil Kural
- English Transliteration
- Deep Contextual Explanation

"A simple start to a meaningful day."

Impact by the Numbers
